## Objective

To be a teacher, catalyst, mentor and pathfinder for a growing technical company. I want to help with software development strategies, testing systems, product design, market positioning, and customer service.

## Professional Achievements

### Technical Business Strategist

- Instrumental in planning and launching web-based businesses: recipe, nutrition, music and teaching
- Helped analyze income strategies vs. staffing, advertising and other costs
- Participated in product, feature and enhancement design in a variety of markets
- Helped produce contract bids from .5 to 10 million dollars.

### Software development leadership

- Created and instituted testing procedures
- Designed and implemented technical support systems
- Optimized productivity of the technical staff

### Programming

- Lead developer of RTC, Berkeley Simulation Software's industry-leading rail simulation tool
- Lead developer of the main compiler products of Lahey Computer Systems
- Lead developer of water monitoring and treatment computer systems

## Skills

- Computer languages: C++, C, PHP, HTML, Fortran, Ruby, Rails, Assembly, Python
- Quick Books, TurboTax, Microsoft Office, Quicken, SQL, Windows, Linux, IOS

## Work History

Owner / Programmer	Indowsay Software / Software solutions	1996 - present
CTO, VP Product development	Lahey Computer systems, Incline Village, NV	1982 - 1996
Systems Analyst, Systems Engineer	Johnson Controls, Santa Ana, CA	1979 - 1982
Programmer	Lahey Computer systems, Rancho Palos Verdes, CA	1976 - 1979

## Education

BS Computer Science	University of California, Irvine	June, 1979
